BlockParty Trading

BlockParty Trading specialises in cryptocurrency and blockchain technology trading. We offer trade analysis across hundreds of currencies and share detailed trade set-ups with our members with a market leading success rate. We currently supply our analysis and set ups to over 14,000 traders internationally.

We manage the BPT Investment fund, an algorithmic crypto trading fund which returns on average 30% per annum, and provide subscription based algorithmic trading bots (via 3commas) which outperform all other trading systems currently available.

Our subscription based trading bots, for a small monthly fee, give individual traders access to a level of performance usually reserved for the world's highest performing hedge funds and wealth managers.

What Are Bots?

Well just let Pro-Trader Reggie tell you >
<https://www.youtube.com/watch?v=TiRsGxkMljQ>

Automated Trading

Fully automated trading allows you to profit from the emerging cryptocurrency trading market without spending days and hours trading and following the markets. Subscribing to our automated trading bot can help you realise the dream of consistent passive income.

Automated trading allows hundreds of trades to be placed simultaneously ensuring a constant flow of profit. Our proprietary algorithm profits in both bull and bear markets, uptrends and downtrends, and trades 24/7.

The efficiency of this method lies in its full automation, you just need to allocate funds for the system to trade with.

Our in house team of quant traders constantly monitor the market and adjust the trading system to ensure you receive optimal performance.

Advantages of automated trading;

- Safe, consistent profits regardless of market conditions.
- Time, you capture profit 24/7 without investing any time, no analysis, research or set-ups required.
- Set & forget, updated & managed by experts so you never miss an opportunity.
- No hidden fees & No capping of returns.
- No holding period/ No capital lock in, trade with and withdraw your funds as you see fit.
- Protected by 3c provides advanced methods for trading security, deposit and withdrawal of funds and account protection.

How to Set up 3c.Exchange or 3.Commas

3Commas is an online platform that allows everyday traders to utilize the benefits of automated trading bots. Irrespective of your experience in this particular field or funds 3Commas aims to cater for investors of all sizes.

3c exchange is a cryptocurrency exchange from the team behind 3commas. It allows the purchase and sale of crypto and links with major exchanges like Coinbase & Binance.

Once you have purchased USDT it is time to deposit funds into your BPT BOT.

To do this you must first create an account with 3.Commas - <https://3commas.io/>

Once you have an account go to; My Account > Deposit

From the dropdown box select USDT, then match the network (we recommend TRC20) with the corresponding network on the exchange in which your USDT was purchased.

Then copy and paste the USDT address from 3c into the exchange and select the amount you wish to transfer.

Double check you have selected USDT on both 3c and Exchange, that the amount to transfer is correct, that the network between 3c and Exchange matches and that the wallet address has copied over from 3c correctly.

If everything is correct, hit ok to transfer funds.

Setting up Automated Trading

Once you are set up with 3Commas or 3c.Exchange (Whichever you choose) then it is time to set up the automated trading with BlockParty BotParty Bot. Here is how:

Visit MarketPlace on the side bar in either 3Commas or 3c.Exchange

Find the BlockParty Trading Signal Provider & Sign Up

(To speed up finding it on the "My Own Filter" option select "Spot Wallet" & "USDT")

Pair	Type	Min profit	Avg profit	Max profit	Date
USDT_QNG	Long	+2.82%	+2.82%	+2.82%	January 11 08:36 PM
USDT_QNG	Long	+2.82%	+2.82%	+2.82%	January 11 08:36 PM

Select the "Subscribe" Option

Purchase the Subscription using secure 3Commas Payment terminal

After you have subscribed now it is time to add the BOT.

In the "Details" Panel select the link to the BOT SETTINGS

There are multiple settings that you can use that suit what you are wanting - check out the Strategy Guide at the end or [click through just here](#)

Once you have selected your setting(s)

(If using Binance US then simply copy the desired strategy and assign USDT_ALL or your preferred pairs)

Details

QUICK SET-UP

DO NOT CHANGE OR ADJUST THE BOT SETTINGS APART FROM THE MAX. ACTIVE DEALS

1. Copy the Custom BlockParty Trading Bot Settings:
3c.Exchange Bot https://3c.exchange/bots/1855636/shared_show?secret=6197f8eac2
2. Assign the correct number of "Max Active Deals" to the allocated automated trading capital

EACH ACTIVE ORDER REQUIRES MINIMUM \$504

DETAILS

Exchange
Binance

Style
Long-Hybrid (Operates effectively in Bull and Bear markets)

Currency
Spot- USDT

Recommended Minimum Total Capital
\$2520

Telegram

It will take you through to the "Bot Settings" that will be automatically filled to the optimal settings (Please do not adjust anything other than the "Max Active Deals". Unless experienced it is advised to not change the bot settings or it will affect expected results or worse leave you in a very bad position!

After you select the link for either the 3Commas Bot Settings you will be taken through the Bot Settings screen and you will need to "COPY" the bot settings.

The bot settings are copied from Paper Trading Accounts so simply IGNORE & COPY when the option comes up

Information		Copy
Name	BPT BotParty - 3commas	
Exchange	BlockParty Trading	
Pairs	USDT_ADA, USDT_ADADOWN, USDT_ADAUP, USDT_AION, USDT_ALGO, USDT_ANKR, USDT_ANT, USDT_ARDR, USDT_ARPA, USDT_ATOM, USDT_AUD, USDT_AVAX, USDT_BAL, USDT_BAND, USDT_BAT, USDT_BCH, USDT_BEAM, USDT_BEL, USDT_BLZ, USDT_BNB, USDT_BNBDOWN, USDT_BNBUP, USDT_BNT, USDT_BTC, USDT_BTCDOWN, USDT_BTCUP, USDT_BTS, USDT_BTT, USDT_BUSD, USDT_BZRX, USDT_CELR, USDT_CHR, USDT_CHZ, USDT_COCOS, USDT_COMP, USDT_COS, USDT_COTI, USDT_CRV, USDT_CTSI, USDT_CTXC, USDT_CVC, USDT_DASH, USDT_DATA, USDT_DCR, USDT_DENT, USDT_DGB, USDT_DIA, USDT_DOCK, USDT_DOGE, USDT_DOT, USDT_DOTDOWN, USDT_DOTUP, USDT_DREP, USDT_DUSK, USDT_EGLD, USDT_ENJ, USDT_EOS, USDT_EOSDOWN, USDT_EOSUP, USDT_ETC, USDT_ETH, USDT_ETHDOWN, USDT_ETHUP, USDT_EUR, USDT_FET, USDT_FIO, USDT_FLM, USDT_FTM, USDT_FTT, USDT_FUN, USDT_GBP, USDT_GTO, USDT_GXS, USDT_HBAR, USDT_HIVE, USDT_HNT, USDT_HOT, USDT_ICX, USDT_IOST, USDT_IOTA, USDT_IOTX, USDT_IRIS, USDT_JST, USDT_KAVA, USDT_KEY, USDT_KMD, USDT_KNC, USDT_KSM, USDT_LINK, USDT_LINKDOWN, USDT_LINKUP, USDT_LRC, USDT_LSK, USDT_LTC, USDT_LTCDOWN, USDT_LTCUP, USDT_LTO, USDT_LUNA, USDT_MANA, USDT_MATIC, USDT_MBL, USDT_MDT, USDT_MFT, USDT_MITH, USDT_MKR, USDT_MTL, USDT_NANO, USDT_NBS, USDT_NEO, USDT_NKN, USDT_NMR, USDT_NPKS, USDT_NULLS, USDT_OCEAN, USDT_OGN, USDT_OMG, USDT_ONE, USDT_ONG, USDT_ONT, USDT_OXT, USDT_PAX, USDT_PAXG, USDT_PERL, USDT_PNT, USDT_QTUM, USDT_REN, USDT_REP, USDT_RLC, USDT_RSR, USDT_RUNE, USDT_RVN, USDT_SAND, USDT_SC, USDT_SNX, USDT_SOL, USDT_SRM, USDT_STMX, USDT_STORJ, USDT_STPT, USDT_STX, USDT_SUN, USDT_SUSHI, USDT_SXP, USDT_TCT, USDT_TFUEL, USDT_THETA, USDT_TOMO, USDT_TRB, USDT_TROY, USDT_TRX, USDT_TRXDOWN, USDT_TRXUP, USDT_TUSD, USDT_UMA, USDT_UNI, USDT_USDC, USDT_VET, USDT_VITE, USDT_VTHO, USDT_WAN, USDT_WAVES, USDT_WIN, USDT_WING, USDT_WNXM, USDT_WRX, USDT_WTC, USDT_XLM, USDT_XMR, USDT_XRP, USDT_XRPDOWN, USDT_XRPUP, USDT_XTZ, USDT_XTZDOWN, USDT_XTZUP, USDT_XZC, USDT_YFI, USDT_YFII, USDT_ZEC, USDT_ZEN, USDT_ZIL, USDT_ZRX	
Strategy	Long	
Target profit (%)	3.0 (total_bought_volume Quote Currency)	

Almost there!

You now have the option to "START" or "Edit Settings" for the Bot it is very important that you go to Edit Settings to allocate your allocated capital for the Bot accordingly.

Let's show you how to do that
Select "Edit Settings"

Apply bot configuration

Name ?

Max amount for bot usage (Based on current rate) ?

 USDT

Average profit per day	0.44%
Balance	16723.21895081 USDT
% of available balance to be used by the bot	> 100%
Exchange	Paper trading account
Edit settings	

Start

IMPORTANT KEY STEP:

Adjust the "Max Active Deals" in accordance to the capital you will be allocating to the automated trading. Each "Deal"

requires different amounts but ensure that you do not surpass your allocated bot capital as it will cause orders to fail.

A screenshot of a trading strategy configuration interface. The 'Max active deals' field is highlighted with a red box and contains the value '140'. Other fields include 'Base order size' (USDT, 11), 'Safety order size' (USDT, 10), and 'Start order type' (Market, Limit).

Max active deals ?		Strategy ?	Profit currency ?		
Max	140	Long	Short	Quote	Base
Base order size ?		Safety order size ?			
USDT	11	USDT	10		
Start order type ?					
Market		Limit			

You can quickly find out how much the bot requires to operate effectively in the top right where it says "Max Amount for Bot Usage"

A screenshot of a bot configuration summary screen. It shows the balance (16723.2189 USD) and the max amount for bot usage (5036 USD). A large green button labeled 'Create Bot' is at the bottom.

Assistant	Chart	Table
Balance		16723.2189 USD
Max amount for bot usage (Based on current rate)	?	5036 USD
Max safe order price deviation		49.77%
% of available balance to be used by the bot		30.12
Create Bot		

FINALLY DOUBLE CHECK THAT THE DEAL START CONDITIONS ARE "BLOCKPARTY TRADING SIGNALS"

A screenshot of a 'Deal start condition' selection screen. The dropdown menu is set to 'BlockParty Trading Signals'.

Deal start condition
Find the right conditions for starting a trade for your bot in our signal market
BlockParty Trading Signals
+

Once happy then select "Create Bot"
Select "Start" to begin the automated trading process - now
your "bot" is up and running.

Select DCA Bots

All active bots will appear here this is where you can select
the "edit" function to update the "Max Active Deals" and when
looking to "cash out" you can also "Disable" or "Stop" the bot

here to start phasing out the trades. Here you can review you bots progress and daily profits

The screenshot shows a trading bot management interface. At the top, there are tabs for 'All', 'Enabled', 'Disabled', 'Short', and 'Long'. Below these is a search bar for the bot's name and a 'Pairs' filter. A table lists trading bots with columns for Name, Exchange, Pair, Active deals, Status, and Action. One bot is visible: 'BPT BotParty - 3commas' on 'Paper Account 238315' (Paper trading account). It is trading pairs like ADA/USD, ADADOWN/USD, etc. The status is 'ON' and it has 54/140 active deals.

Name	Exchange	Pair	Active deals	Status	Action
BPT BotParty - 3commas TTP: 3.0%(0.05%), BO: 11.0 USDT, SO: 10.0 USDT, OS: 1.5, SS: 1.57, MAD: 140, SOS: 0.79, MSTC: 8, SDSP: 1 BlockParty Trading Signals	Paper Account 238315 Paper trading account	ADA/USD, ADADOWN/USD, ADAUP/USD, AION/USD, ALGO/USD, ANKR/USD, ANTI/USD, ARDR/USD, ARPA/USD, ATOM/USD	54 / 140	ON	[Eye] [Trash]

To view your trades select the "My Deals" on the sidebar

FAQ's

- Can I increase the amount I am trading with

Yes, you can increase the "Buy Order" & "Safety Order Size" again in small gradients as they will have a huge overall effect on the total. Always be aware of the "Max Amount for Bot Usage"

- Can I use this with Futures

We do not advise trying to retro-fit this to the Futures or Leverage function

- Is this just with Binance

Yes

- Can I adjust target profits for upcoming deals and existing deals?

You can edit anything in the bot settings and also anything in the open deals - this is highly advised against as all settings are optimised in harmony with the signals coming from BlockParty Trading.

- Will this work with BTC pairs?
No, although we are currently working on a Bitcoin pairs automated trading system - so follow us on Telegram, Twitter or Instagram to hear when it launches.

- How long does it take to withdraw my money?
It can take anywhere between a Day to a Month - since you are trading real life scenarios it will not be instant unless you want to close trades immediately which will likely result in losses. Simply "stopping" the bot and letting the trades organically hit target profits will enable you to exit the market with no losses incurred. Very simple but can require patience at times.

- Am I at risk of being liquidated?
No - with time trades that have sunk into the red can and will
always come back up especially with the advised strategies in place
